Anna-Maria Orwat

QA specialist

If I was to describe my approach to professional life, I would say: take opportunities and make the best out of them.

My tech career path began unconventionally - I was working on a software project on the client's/business side, and then I was taken over by my current development team as their new QA.
I now have 18 months of QA experience under my belt - never looked back since!

Employment history

Software tester at DAC Software Polska

December 2019 - up to now

- Defining test scenarios based on business requirements
